High Performance Coatings for Fishing Vessels

Coating solutions to combat fouling, corrosion and abrasion

AkzoNobel – world class paint supplier, with service to match

At Akzonobel we've got you covered. We are passionate about paint, delivering protection through our world-class portfolio of brands including Dulux, International, Sikkens and Interpon. We are constantly innovating, delivering new solutions that drive our customers' industries forward.

High Performance Coatings for Fishing Vessels

We know that fishing vessels frequently face harsh environments and need advanced coatings to maintain high performance in challenging conditions with reduced in service maintenance requirements. At Akzonobel we provide a range of cutting-edge coating solutions to combat fouling, corrosion and abrasion both above and below the waterline.

Fouling control

A smooth clean hull will minimise drag, maximise performance and ensures your vessel looks its best. We provide a full range of coatings for fouling control providing comprehensive protection below the waterline.

Area	Product	Feature	Benefits
Underwater Hull	Intersleek 1100R Biocide-free, slime release coating	<ul style="list-style-type: none"> Ultra-smooth surface Minimum 60 months in service period Biocide Free Gloss finish 	<ul style="list-style-type: none"> Releases fouling, reducing drag and fuel consumption Reduced through life docking costs Low environmental impact Improved vessel aesthetics
	Intercept 8500 LPP Ultra-performing, TBT Free, Low friction, Silyl Methacrylate	<ul style="list-style-type: none"> Optimised biocide package Linear polishing rate Thin film schemes 	<ul style="list-style-type: none"> Excellent performance delivering a clean hull in the harshest fouling environments Predicable performance regardless of water temperature Less paint required

Hard-wearing & durable cosmetics

Using Akzonobel products means you don't have to compromise between durability and your vessel's appearance. Our Interfine and Interthane product lines combine outstanding gloss and colour retention with corrosion and abrasion resistance ensuring your boat looks its best. All are available in a wide range of colours via the Chromascan® remote tinting system.

Area	Product	Feature	Benefits
Topsides Superstructure	Interfine 878 Polysiloxane Finish	<ul style="list-style-type: none"> Excellent long-term gloss and colour retention Good abrasion and impact resistance Easy to apply 	<ul style="list-style-type: none"> Long lasting and durable so your vessel looks its best for longer Reduced corrosion due to mechanical damage Can be applied by airless spray, brush or roller
	Interthane 990 Polyurethane Finish	<ul style="list-style-type: none"> Good gloss and colour retention Low temperature cure Easy to apply 	<ul style="list-style-type: none"> Premium appearance, reduced maintenance and resistance to staining Year-round workability Can be applied by airless spray, brush or roller

Protection That Lasts

We supply products for all vessel areas providing excellent abrasion resistance and corrosion protection in harsh environments or while exposed to water. Meanwhile, our advanced tank linings help to ensure specified service lifetimes.

Area	Product	Feature	Benefits
Splash zone Working Deck	Interzone 1000 High solids, high build epoxy with chemically resistant glass flake	<ul style="list-style-type: none"> Outstanding abrasion resistance and corrosion protection High Volume solids (92%), very low VOC (75g/Lt[^]) 	<ul style="list-style-type: none"> Enhanced durability and corrosion resistance even in the most demanding areas Reduced solvent emissions, less waste
Working Deck Manufacturing Areas	Intershield 300 Aluminium Pure Epoxy Universal Primer	<ul style="list-style-type: none"> Excellent corrosion and abrasion resistance Optimum levels of aluminium pigmentation Long successful track record 	<ul style="list-style-type: none"> Long term asset protection Corrosion control Proven performance in Marine industry
Fish Holds	Interline 994 Epoxy phenolic tank coating	<ul style="list-style-type: none"> Excellent chemical resistance and USA FDA / EU Food Contact compliance 	<ul style="list-style-type: none"> Operational flexibility and reduced risk of cargo contamination

[^] EPA Method 24

Onboard Maintenance

Intershield One-2-One is a surface-tolerant epoxy primer, optimised as a crew-friendly solution for onboard maintenance ideal for anticorrosive touch-ups. The equal mix ratio helps to improve productivity and reduce waste.

Area	Product	Feature	Benefits
Onboard Maintenance	Intershield One-to-One	<ul style="list-style-type: none"> Small pack sizes 1:1 mix ratio Universal primer Excellent corrosion and abrasion resistance 	<ul style="list-style-type: none"> Easy to use and apply Reduces paint wastage from incorrect mixing and partially used tins Fewer products required Long term asset protection
